4 Race Tour Code Contemporary

**Non siamo più solo in pista.
Siamo nei tre mondi di Spyke.**

4 Race, Tour Code, Contemporary. We are no longer only on track, we are in the three Spyke worlds.

Chiunque tu sia, qualunque cosa tu faccia e qualunque moto guidi, esplora il mondo di SPYKE. Ti presentiamo la collezione 2020 ispirata dalla nostra storia di oltre quarant'anni di passione ed esperienza nel Motosport. Ci mettiamo l'anima per costruire capi d'abbigliamento da moto sicuri, confortevoli e dall'aspetto entusiasmante.

Tenendo ben presente l'importante eredità ricevuta dai GRANDI PILOTI con cui abbiamo avuto il privilegio di collaborare negli anni, ti invitiamo a far parte di questa storia...

Distinguiti in circuito.

Viaggia verso l'ignoto con qualunque condizione atmosferica.

Muoviti agilmente in città con stile.

Whoever you are, whatever you do and whatever you ride –explore the world of SPYKE. We present you the 2020 collection inspired by the heritage and 40 years of knowledge, passion and experience in sport. We put all our effort to create a motorcycle garment which is safe, comfortable and awesome looking. Having in mind the legacy of BIG NAMES, we invite you to become a part of this history. So...

Be a star on the racetrack.

Travel into the unknown whatever the weather.

Rush through the city.

#jointherace and #feelthespeed

The image features a person wearing a dark motorcycle jacket with 'MOTORCYCLIST' written on the sleeve. The person is standing in a field with a dirt path. The text 'SOFT SHELL & INSULATOR JACKET' is overlaid on the image in a large, bold, sans-serif font. The letters are filled with a light brown, textured pattern, possibly representing insulation or a soft shell material. The text is arranged in four lines: 'SOFT', 'SHELL &', 'INSULATOR', and 'JACKET'.

TECH FEATURES

PELLE TECNICA PER USO MOTOCICLISTICO

Uso di pellami lavorati in Italia, con un'importante varietà di gamma, dove la scelta della materia prima nasce dalle performance richieste al capo.

HIGH TECH LEATHER FOR RIDING PURPOSES

Use of leathers treated in Italy, with a wide diversity of range, where the selection of raw materials arises from the performance requested from the garment.

01 - Pelle bovina smerigliata

Morbida, alta resistenza a trazione e strappo, spessore 1,2mm/1,3mm, idrorepellente.

02 - Pelle rinata a pigmento

È la più resistente ed è il pellame più usato nell'abbigliamento racing grazie alla sua versatilità. La superiore resistenza alla luce e al grao è ottenuta tramite l'applicazione di un lm pigmentato di rinizione; la supercie inoltre può essere stampata, anche in rilievo, oppure serigrafata.

03 - Pelle canguro pieno fiore

Rinita, morbida, idrorepellente, dall'aspetto lucente, che consente così di avere dei capi per un uso sportivo agonistico con il miglior rapporto possibile fra performances meccaniche e leggerezza.

04 - Pelle traforata bovina o di canguro

Morbida, con areazione tecnica che permette di localizzare le prese d'aria solo dove è indispensabile, lontano dalle cuciture, garantendo quindi oltre ad un'estetica migliore, anche una maggiore sicurezza in caso di caduta.

05 - Crosta bovina

Resistente per le parti più impegnative, più esposte a contrasto con oggetti esterni, generalmente utilizzata per inserti scamosciati, dalla "mano" vellutata e calda, molto confortevole al tatto.

06 - Pelle bovina e ovina trattata anilina

È quella che ha l'aspetto più naturale, in quanto è priva di qualunque rinizione coprente. Conserva le caratteristiche singolari del manto dell'animale per questo vi è la possibilità di intravedere dierenti sfumature di colore. Il pellame lavorato all'anilina viene tinto, ma non è rinito con alcuna pellicola a polimeri o pigmenti. Si applica un sottile strato di lacca trasparente, che ha la funzione di proteggere dalle macchie e conferisce un tono di lucidità.

07 - Pelle vintage

Tipologia di articoli concepiti per avere un look unico e personale grazie ai particolari trattamenti di concia a base di resine ed ingrassi di origine naturale che enfatizzano con l'utilizzo il caratteristico eetto "vissuto".

Gli standard qualitativi garantiscono inoltre elevate solidità dei colori in funzione delle destinazioni d'uso per cui il capo è stato progettato.

01 - Snued cow leather

Soft, high tension and tearing resistance, 1,2mm/1,3mm thick, water repellent.

02 - Pigment nished leather

It is the most resistant and it is the more used leather in racing clothing due to its versatility.

The superior resistance to light and scratches is achieved through the application of a nishing pigmented lm; furthermore, the surface may be printed, also embossed, or silk screen printed.

03 - Full grain kangaroo leather

Rened, soft, water repellent, with a shining appearance, which allows in this way to have racing sports clothing with the best possible balance between mechanical performances and lightness.

04 - Kangaroo or cow perforated leather

Soft, with high tech ventilation allowing to locate the air vents only where indispensable, away from the seams, thus ensuring, further than better looks, also better safety in the event of a fall.

05 - Cow split grain

Resistant for the most stressed parts, the more exposed to the contrast with exterior objects, generally used for suede inserts, having a velvety and warm nish, very comfortable to touch.

06 - Aniline treated cow or sheep leather

It's the one with the most natural appearance, because it has no cover nishing. It keeps the unique features of the coat of the animal, for this reason there is the possibility to glimpse dierent shades of color.

The leather treated with aniline is dyed, but it is not nished with any polymeric lm or pigment a thin layer of transparent layer is applied, with the function to protect from stain and to give a touch of shine.

07 - Vintage leather

Type of goods designed to have a unique and personal look thanks to peculiar natural sourced resin and grease based tanning treatments which highlight with the use the specic "worn" eect.

The quality standards guarantee as well high solidity of colors in function of the use destination for which the garment was designed.

TESSUTI TECNICI PER USO MOTOCICLISTICO

I capi Spyke utilizzano tessuti ad alta tenacità con speciali lavorazioni che combinano trame bi elastiche e orditi in lati ritorti. La combinazione e la selezione di speciali bre di Poliestere 600D, Cordura, Nylon, Rayon, Lycra, con grande resistenza alla trazione, al taglio, al calore e alla lacerazione e dalla bassissima conducibilità elettrica, dalle eccellenti performance meccaniche che vanno sommate a leggerezza e facilità di manutenzione e pulizia, rendono i capi in tessuto adatti all'uso in condizioni climatiche avverse, anche grazie al trattamento di idrorepellenza, garantendo un'adeguata protezione in caso di scivolata. In caso di pioggia, è sufficiente l'asciugatura dei capi all'aria per permettere di riattivare tutte le caratteristiche di oleo e idrorepellenza dei tessuti.

ZIP SPECIALI

I capi tecnici Spyke utilizzano innovativa lampo a spirale di Nylon, altamente resistenti agli sbalzi termici e perfettamente adattabili alle curve del corpo. Tenacità, resistenza all'utilizzo e all'usura, adabilità, uidità e precisione di chiusura ne caratterizzano le prestazioni. Le tute racing montano speciali zip a me retardant, in grado di rispondere alle normative in merito alla protezione contro il calore e la fiamma, con un L.O.I. (limit oxygen index) tra 28-30. Nei capi più sportivi e racing si utilizzano le nuove zip con cursore antiottaggio autobloccante.

HIGH TECH FABRICS FOR RIDING PURPOSES

Spyke clothes use high tenacity fabrics with special treatments combining bi-elastic weaves with twisted yarns. The combination and the selection of special 600D Polyester, Cordura, Nylon, Rayon, Spandex, having high resistance to traction, cut, heat and tearing with the minimum electric conductivity, having excellent mechanical performances which must be added to lightness and easy maintenance and cleaning, make the fabric clothes suitable to be used under adverse weather conditions, also thanks to the water proofing treatment, guaranteeing an appropriate protection in case of slide. In case of rain, the simple drying of the clothes at the air is enough to reactivate all the oil and water repellence features of the clothes.

SPECIAL ZIPS

Spyke high tech clothes employ innovative Nylon spiral zip closure, having a high resistance to thermal shocks and perfectly adapting to the shapes of the body. Tenacity, resistance to use and wear, reliability, uidity and accuracy of closure characterise their performance. The racing suits are equipped with ame retardant zips, able to meet the rules on the protection against heat and ame with a L.O.I. (limit oxygen index) ranging from 28 to 30. The sportier and racing clothes use the new zips with auto-locking antifloating slider.

ICONS

AIR STRUCTURE

Spyke products with this sign have lining made of 3D mesh fabric. Thanks to this solution, more air circulates around rider's body, which makes garment more breathable.

SLIM FIT

This icon means that garment has Italian fitting and will make you look even more fashionable and will emphasize your figure.

CE

CE marking on product means that it has been submitted to a EU examination assessment in accordance with the requirements in the Regulation (EU) 2016/425 and has been granted a 2nd CAT. PPE (Personal Protective Equipments) against medium risks.

SSD - SPYKE SYNTHETIC DOWN

Synthetic down insulation offers a light weight, similar loft alternative to natural down.

DRYTECNO

Drytecno is a technology used by Spyke to protect the rider from rain and wind. The polyurethan resin membrane (PU), having a unique structure especially created to be used on the bike, which absorbs and drives out sweat but remains waterproof, ensures maximum protection from external elements. The unique construction of the garments with Drytecno technology creates a wide dry air volume between body and waterproof barrier, strongly reducing the risk of condensation from excessive sweat and contributes to keep constant the skin temperature (eliminating the heat dispersion through direct conduction body-lining-water).

AIR

The AIR products guarantee an appropriate ventilation thanks to extended net inserts or breathable perforated leather of differential weaves, further than the several perforated inserts in the zones where transferring outside of the body heat is needed.

X STRETCH

Special construction technology implying the use panels in innovative Elastomere combined in weaving with polyamidic yarns with high tenacity (x-stretch fabric) to guarantee optimal comfort and t thanks to the bidimensional elasticity. In the racing suit the x-stretch fabric is coupled with a leather panel, which, thanks to special gusset seams stretches lengthwise and in width, allowing to the rider agile and comfortable movements.

LOOSE LAYERS

The new "unlined" construction multilayer jackets are designed for achieving the best comfort and the best mobility for chest and arms, thanks to the reduction of friction between the components of the garment (shell-insert insulation-membrane).

RACING

Employment of cow leather for sporting purposes of kangaroo leather with a resistance to abrasion of more than 2000 Martyn Dayl cycles, more than 70kg/Newton tear resistance, no use of chemical products harmful for man, ex test (warm and cold), CE 1621-1 race use certification. To make a leather suit for track use 6 meters of cow leather (weight 5,5 kg), or 8 meters of kangaroo leather (weight 4,2kg) are needed.

REINFORCED THREAD

The seams reinforced with heavy duty yarns add durability to most abrasion and tension stressed parts of the garment.

FIT FOR LADY

Women's Spyke garments are created for the woman who does not want to quit her femininity, not even on two wheels. Thanks to the cut and the lines following feminine shapes, the adjustment velcro straps, the belts to enhance the waistline, but also more comfortable volumes in the breast area, Spyke women's garments dress riders in a comfortable and performing way, without giving up modern looks and maximum safety.

THERMAL

Spyke Thermal clothing offers warmth and comfort without adding weight. Lightness and freedom of movement are the key features of the products having the Thermal insulation technology, which, thanks to special paddings, grant a high resistance and a huge breathability, without absorbing water or humidity. The low heat transmission coefficient allows retaining temperature heat with even better features than wool.

REMOVABLE IN LINER

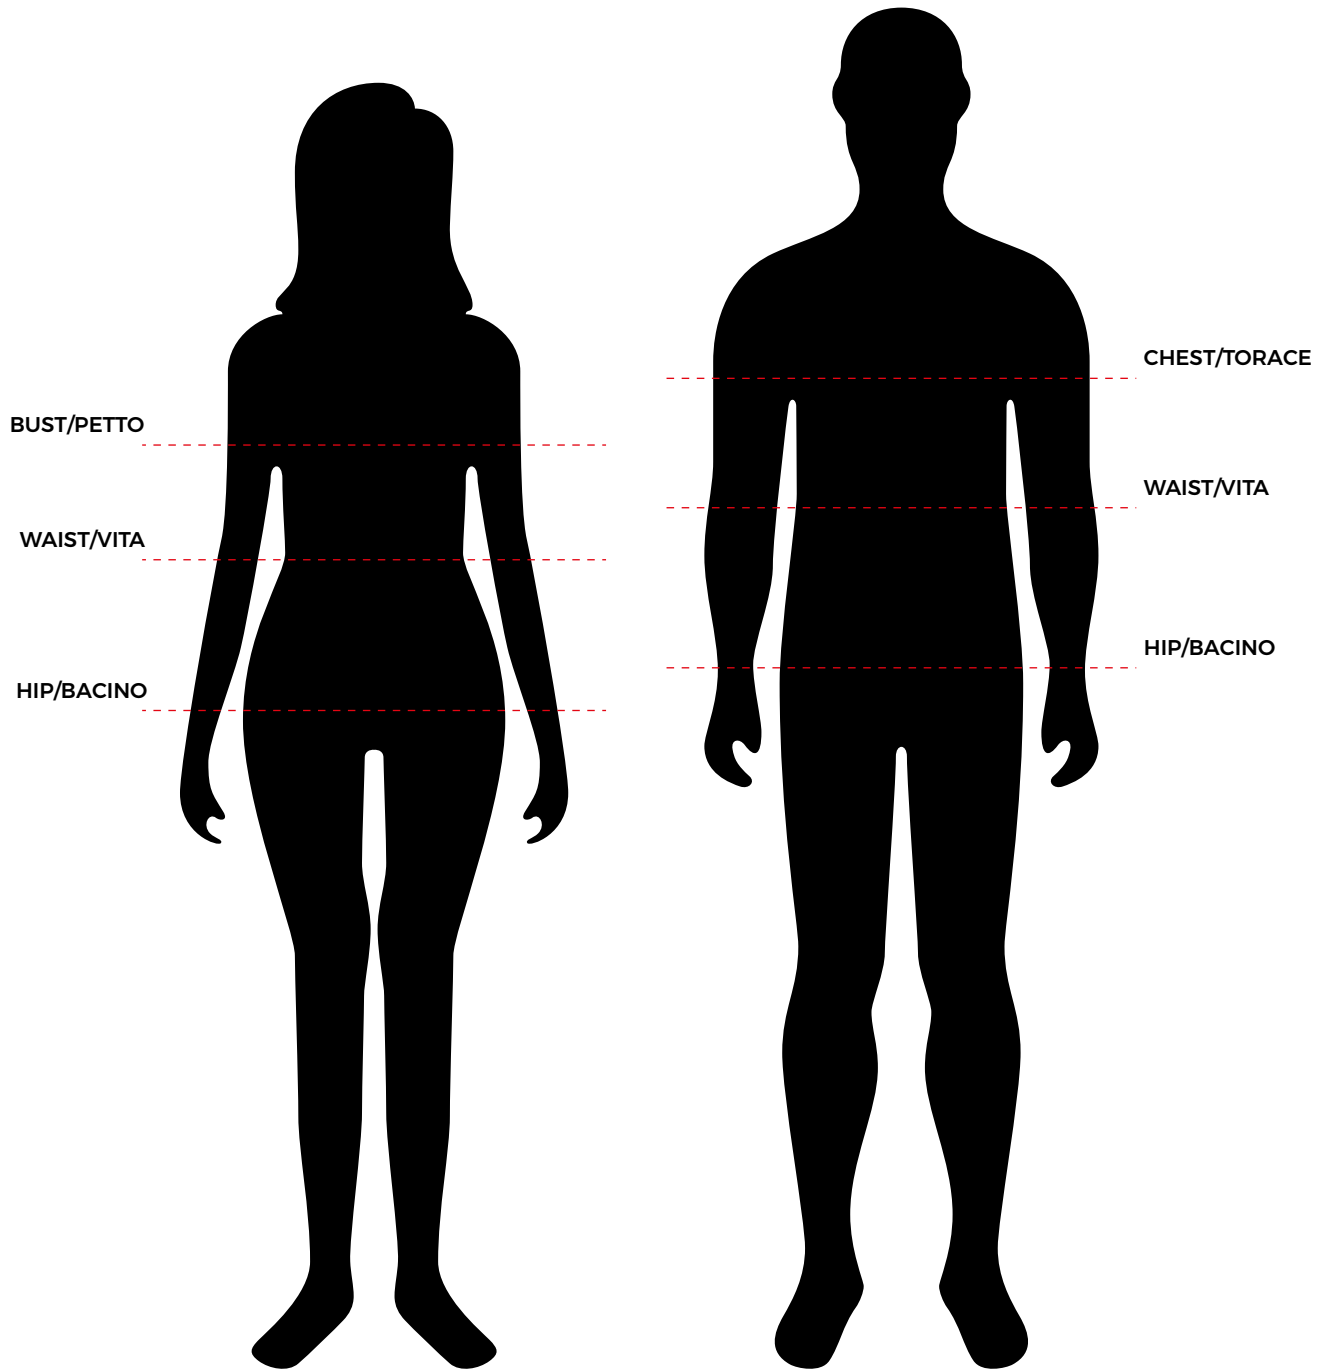

The inner layers can be removed and washed separately for a correct hygiene of the garment.

TAPED SEAMS

The seams of the Dryteco equipped garments are thermal-taped to prevent even the tiniest penetration of water.
